

# Hello, Developer!

We are a small software development company from Vienna, Austria, building great products that people use. The work you will do with us will be used by hundreds of thousands of people.

Our success in building high-quality applications has led us to the decision to expand and grow, so we are building a new team in Pristina, Kosovo.

We are looking for someone smart and capable, someone we can learn from and someone who wants to learn from us.

Currently we are building our mobile applications mostly native – with Objective-C/Java and C# – but we also create hybrid applications that use WebViews and JavaScript Bridges to communicate.

We also do some web development for our own products. We mostly use Linux, Angular.js, Ember.js, RubyOnRails and PostgreSQL for this.

In the future we would like to deepen our knowledge of GIS (PostGIS), Rust, Go, Angular.js and Ember.js.

We would love to build products with you. What do you care about?

**Tell us.**

## iOS or Android Developer

- You are able to develop high-quality native and hybrid mobile applications for iOS and/or Android.
- You are able to talk to, as well as design, HTTP Rest APIs. You understand network protocols and data formats like JSON and XML.
- You are able to work comfortably in a mostly Mac/Linux environment.
- You are able to select and create efficient algorithms and data structures based on sound computer science principles and modern software engineering techniques.
- You have a natural interest in programming languages, new frameworks and tools.
- You are a great communicator and love to tell others about the latest developments in your field.
- Perfect English and/or German

## Bonus Qualifications

- Linux/Unix System Administration
- You know C# or have experience with Xamarin
- You also know web development, JavaScript, PHP or Ruby.
- You are good at UX and UI Design.
